waste disposal

Hand contactless  
operation

The practical pedal bag holder is suitable for waste bags up to 120 ltr. (110 x 70 cm). Thanks to the rubber lips the bin liner is firmly fixed.

But the best thing about it is the handle-free operation. **The waste can thus be disposed of without hand contact with lids or other parts.**

**The pedal bag holder is therefore particularly suitable for hospitals, old people's homes, nursing homes but also retail and catering trade.**

## Sneeze guards with and without opening

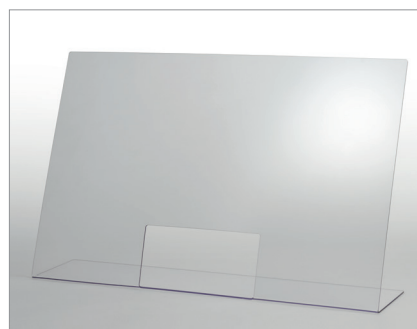

The best way to prevent the transmission of viruses is to avoid direct contact „face to face“. A reduction of social contacts is very important, but it is not possible to prevent them completely. Nevertheless, visits to the doctor, shopping, etc. must be made. Here a sneeze guard is a good solution. This is simply placed between the conversation partners. The hygiene protection wall can be placed on the counter, the desk, or at the cash desk.
